ABOUT SUSTAINABLE SINGAPORE GALLERY (SSG) & MARINA BARRAGE

Housed at the Marina Barrage, the SSG integrates six learning zones and traces Singapore's response to climate change, water management strategies, zero waste initiatives and practices to keeping the nation clean, green and sustainable. Each zone addresses a theme, reflected through the space's materiality and use of interactive multimedia technology that contributes to a highly immersive experience.

Visiting the SSG and Marina Barrage also offers an extensive understanding of environmental sustainability, with green principles applied in all aspects of the design. Experience the sustainable features such as the Green Roof, the Solar Park and more.

ABOUT SSG SCHOOL PROGRAMMES

Singapore is vulnerable to the effects of climate change such as rising temperature, rising sea level and more frequent heavy rainfalls. Students, educators and school administrators can all play a role in fighting climate change and building a sustainable future for generations to come.

The SSG School Programmes seek to extend sustainability, character, citizenship education, science, geography and social studies learning beyond the classrooms, enhancing these efforts by providing an authentic and experiential learning platform. The challenge & tasks-centric activities are designed to ignite interest & involvement, enable extension of subject learning, and promote rethinking of possibilities.

Support the programmes to develop students into concerned citizens and active contributors. Shape the future generations who are equipped with critical & inventive thinking, self-awareness and ability to make responsible decisions.
