RECENT CIRCULARS RELATED TO BUILDING PLAN SUBMISSION

PUB SERVICE PLANS VIA SLA INLIS PORTAL

As part of technology refresh and service improvement, PUB service plans (SIP, DIP & WSP) will now be provided through SLA's INLIS Portal.

The following improvements will be seen with this service.

- Shorter time to receive plans
- No mapsheet cap limit
- More tools to select area, such as point selection with buffer and polygonal selection

The service can be accessed using the following link.

<https://www.sla.gov.sg/INLIS/#/PUB/UP/Search>.

The user guide for PUB service plans on INLIS can be downloaded from this link.

<https://www.sla.gov.sg/INLIS/SamplePDF/PUBUserGuide.pdf>

CODE OF PRACTICE ON SURFACE WATER DRAINAGE – 7TH EDITION

The 7th Edition of the Code of Practice on Surface Water Drainage has been implemented since 1 Dec 2018 and can be downloaded from PUB's website via the link:

<http://www.pub.gov.sg/compliance/industry/codeofpractice>

Note:

We note that some QPs may have already prepared their submissions based on mRL. To minimise the impact to QPs, PUB will continue to accept submissions prepared using both mRL and SHD, provided the plans are clearly endorsed with the datum that is being used.

For more details on the circulars, please visit our PUB website at the following link

<https://www.pub.gov.sg/compliance/industry/circulars>

RECENT CIRCULARS RELATED TO BUILDING PLAN SUBMISSION

CHART FOR ONLINE DETENTION SYSTEM AND INFORMATION TO BE PROVIDED

PUB has developed a chart for QP to estimate the volume of an **online detention system** so as to work out the footprint needed. The chart and the technical guide for on-site stormwater detention tank systems can be downloaded from PUB's website via: <https://www.pub.gov.sg/compliance/qualifiedpersonsportal/processflow>

Reminder

Please provide the following details for submissions involving Online Detention System.

- Development Control (DC): The proposed location, dimensions and volume of the online detention system has to be indicated in the submission.
- Detailed Plan (DP): The design details (such as calculations and/or hydraulic model results) showing how the proposed detention system meets the required peak runoff shall be submitted and endorsed by a PE(Civil).

TECHNICAL BRIEFING SESSIONS

We have organized a series of briefing to help you with your submissions.

Date	Topic
31 May	<ul style="list-style-type: none"> • Introduction to SS636 • Water Tank Maintenance and Security • Common Submission Mistakes
28 June	<ul style="list-style-type: none"> • Update to Code of Practice on Sewerage and Sanitary Works • CORENET Forms

Please click on the date to register.

Time : 3 – 5 pm (for both sessions)
Venue : Waterhub Auditorium (2nd Floor) 80 Toh Guan Road East Singapore 608575

QUICK SUBMISSION GUIDES

We have updated the online guides to help the industry with its submissions to PUB. These guides can be downloaded from PUB's website via: <https://www.pub.gov.sg/compliance/qualifiedpersonsportal/quicksubmissionguides>
